

RVCE/MCA/RL/2022 – 23

Date:22/11/2023

LETTER OF RECOMMENDATION

In the capacity as Associate Professor, Department of MCA at R V College of Engineering, Bangalore, I, Dr. S Anupama Kumar, take the pleasure in writing this letter of recommendation for Mr. Nithin. He is known to me from past 2 years as a student and alumnus. I have taken courses of Deep learning, and Project guide for his Major projects as a part of the program. He has maintained a good academic record in my courses. In my capacity as course handling faculty and project guide, I have observed Nithin at close quarters, and found him to be a disciplined, obedient, intellectual and a committed student. I consider him to be a highly suitable candidate for the master's program at your esteemed University.

Nithin's consistent high grades and learning new skills to stay ahead of all was the most laudable factors regarding his coursework amongst others. His proficiency in coding and programming had been commendable, enabling him to score excellent grades in all the papers. From assessments conducted periodically noticed Nithin's confidence, presentation skills and research-oriented approach in carrying out works is very adorable. His creative and logical thinking, implementation of new ideas and presenting them is very commendable. Enriching these skills, he could carry out the works on "Virtual Assistant Using Deep Learning Techniques". Additionally, on November 3rd, 2023, he delivered his technical paper at an IEEE conference on "Virtual Assistant Using Deep Learning Techniques," and yet to be published in IEEE Explore.

Based on my observations and interactions with Mr. Nithin, I am confident that he possesses the qualities necessary for success in his future endeavors. I believe he has the potential to excel both academically and professionally, and I wholeheartedly recommend him for any opportunities that align with his interests and skills. I am confident of his capabilities, and I recommend him for graduation studies in your prestigious university.

Yours sincerely,

Dr. Anupama kumar
