General Course Information

Description

This accelerated course is for those students who are already familiar with the IELTS and want to proceed faster through the course. When we design a course, we must create it for a student who is starting to learn the IELTS with no experience with the exam. However, some students desire a more streamlined course, and this accelerated course syllabus arrangement is for those students. We give a lot of examples that explain the strategy, and for some students, this is more than they need. As a result, we have created an accelerated syllabus. Of course, our recommendation is to do the complete course from start to finish. If you listen to a lecture and still do not understand, there are other video course lectures that you can watch for more explanation and examples.

Expectations and Goals

The expectation is that you are already very familiar with the IELTS, have been successful, and just need that added push to fill in the gaps that you are missing. Please keep in mind that you are responsible and accept the realities of taking an accelerated version of the course.

Accelerated Course Time Requirements

The total time commitment is: ___30 Hours____

If you do not have a lot of time available, it is possible for you to reduce this 6-week suggested process to a 3-week course. Of course, if you have very specific needs, you can just watch the lectures that fit your needs and reduce the time involved. You have control over your process.

** There are lectures not included in the accelerated syllabus that are actually very helpful, such as the Live Class Lectures that are uploaded into the course. In addition, we have several lectures on specific question types that are there for students who need additional explanations and examples of strategy application. If you watch one lecture, such as a Yes, No, Not Given lecture, and understand, it is not necessary to watch the additional Yes, No, Not Given lectures. This is why we created this accelerated course syllabus.
